FILE NO. 333-200101
SUPPLEMENT

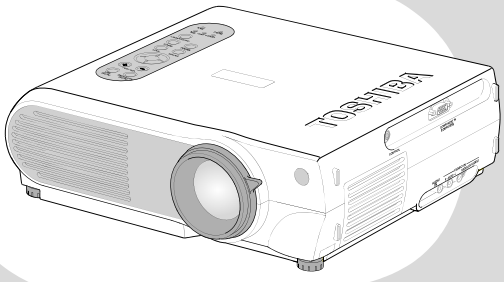
SERVICE MANUAL

3LCD PROJECTOR

TLP-MT7U
TLP-MT7E

— SUMMARY —

This service manual covers only different portions from service manual (File No. 330-200008) for TLP-X series.



Document Created in Japan Jun.,2001

1. Major different specifications from TLP-X series

Item	TLP-MT7	TLP-X series
Use	for video theater mainly	for data display mainly
LCD panel	1.25", 16:9 aspect, 1280 x 720 dots	1.3", 4:3 aspect, 1024 x 768 dot
Luminance output	1000 ANSI lumens	2000 ANSI lumens (TLP-X10/X11)
Power consumption	265W	320W (TLP-X10/X20)
Body color	Pearl white	Silver
PC card slot	No	Yes
PAL 625i mode	Yes	No
Document imaging camera	No	Yes (TLP-X11/X21)
Connectors	USB, MONITOR OUT and DVI IN are removed.  AUDIO OUT is removed	Remote control	There are not laser pointer and remote mouse function. Other functions are same as remote control of TLP-X series.  	Accessories	Owner's manual ..... 1 Remote control ..... 1 R6 (AA) size battery ..... 2 Power cord ..... 1 Signal cable (for Component video) ..... 1 (except TLP-MT7E*1) AV cable ..... 1 Audio cable (ϕ3.5 stereo plug) ..... 1 Control cable ..... 1 *1: This may be added in the future for TLP-MT7E	Owner's manual (Getting started) ..... 1 Owner's manual (CD-ROM) ..... 1 Remote control ..... 1 R6 (AA) size battery ..... 2 Power cord ..... 1 RGB cable ..... 1 DVI analog cable*2 ..... 1 Adapter for Macintosh computers ..... 1 AV cable ..... 1 Audio cable (ϕ3.5 stereo plug) ..... 1 Control cable ..... 1 USB cable ..... 1 *2: This is added from April 2001 and later.

2. Service tools

The service tools of TLP-X series (each extension cable and adjustment software (SINGO98.exe, TLPX10S.exe and CNTX10S.exe)) can be used for TLP-MT7.

3. Panel holder service kit

Parts number of the kit "23405031" is registered for TLP-MT7 exclusive use.
The contents of the service kit, please refer to the manual page 1-17 of TLP-X series. (The shapes of the panel holders are different from TLP-X series because the LCD panel's shapes differed.)

4. Service parts list

The following parts list covers only the different parts from TLP-X series.
For the other parts, please refer to the service manual (File No, 330-200008) of TLP-X series.

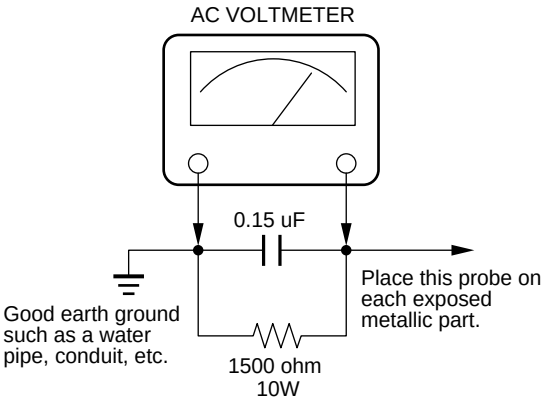
SAFETY PRECAUTION

WARNING: Service should not be attempted by anyone unfamiliar with the necessary precautions on this projector. The following are the necessary precautions to be observed before servicing this chassis.

1. An isolation Transformer should be connected in the power line between the projector and the AC line before any service is performed on the projector.
2. When replacing a chassis in the cabinet, always be certain that all the protective devices are put back in place, such as; non-metallic control knobs, insulating covers, shields, isolation resistor-capacitor network etc.
3. Before returning the set to the customer, always perform an AC leakage current check on the exposed metallic parts of the cabinet, such as terminals, screwheads, metal overlays, control shafts etc. to be sure the set is safe to operate without danger of electrical shock. Plug the AC line cord directly into a AC outlet (do not use a line isolation transformer during this check). Use an AC voltmeter having 5000 ohm per volt or more sensitivity in the following manner: Connect a1500 ohm 10W resistor, paralleled by a 0.15 uF, AC type capacitor, between a known good earth ground (water pipe, conduit, etc.) and the exposed metallic parts, one at a time. Measure the AC voltage across the combina-tion of 1500 ohm resistor and 0.15 uF capacitor. Reverse the AC plug at the AC outlet and repeat AC voltage mea-surements for each exposed metallic part. Voltage mea-sured must not exceed 5.25V(rms). This corresponds to 3.5 mA(AC). Any value exceeding this limit consti-tutes a potential shock hazard and must be corrected immediately.



PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in this chassis have special safety-related characteristics. These charac-teristics are often passed unnoticed by a visual inspection and the protection afforded by them cannot neces-sarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this manual and its supplements; electrical components having such features are identified by the international hazard symbols on the schematic diagram and the parts list.

Before replacing any of these components, read the parts list in this manual carefully. The use of substitute replacement parts which do not have the same safety characteristics as specified in the parts list may create shock, fire or other hazards.

ULTRAVIOLET DANGER IN SERVICE MODE

Eye damage may result from directly viewing the light produced by the lamp used in this product. Always turn off lamp before opening this cover. Ultraviolet radiation eye protection required during servicing.

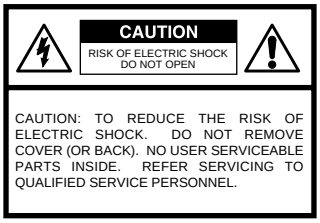
PART REPLACEMENT AND ADJUSTMENT PROCEDURES

SECTION 2
SERVICING DIAGRAMS

SECTION 3
PARTS LIST

SAFETY PRECAUTIONS



The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDETHE ENCLOSURE. DO NOT OPEN THE CABINET. REFER SERVICING TO QUALIRED PERSONNEL ONLY.

CAUTION: Laser beam is emitted when the laser button of the remote control is pressed. Do not look from the front of the remote control. Do not face toward a person or to a mirror.

FCC Radio Frequency Interference Statement

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiates radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.
Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

WARNING: Changes or modifications made to this equipment, not expressly approved by Toshiba, or parties authorized by Toshiba, could void the user's authority to operate the equipment.

Notice: This Class A digital apparatus complies with Canadian ICES-003.
Cet appareil numerique de la classe A est conforme a la norme NMB-003 du Canada.

IMPORTANT PRECAUTIONS

Save Original Packing Materials

The original shipping carton and packing materials will come in handy if you ever have to ship your LCD projector. For maximum protection, repack the set as it was originally packed at the factory.

Avoid Volatile Liquid

Do not use volatile liquids, such as an insect spray, near the unit.
Do not leave rubber or plastic products touching the unit for a long time. They will mar the finish.

Moisture Condensation

Never operate this unit immediately after moving it from a cold location to a warm location. When the unit is exposed to such a change in temperature, moisture may condense on the crucial internal parts. To prevent the unit from possible damage, do not use the unit for at least 2 hours when there is an extreme or sudden change in temperature.

In the spaces provided below, record the Model and Serial No. Iocated at the bottom of your LCD projector.

Mode No. _____ Serial No. _____

Retain this information for future reference.

IMPORTANT SAFETY INSTRUCTIONS

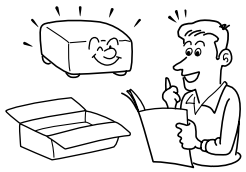
CAUTION: PLEASE READ AND OBSERVE ALL WARNINGS AND INSTRUCTIONS GIVEN IN OWNER'S MANUAL AND THOSE MARKED ON THE UNIT. RETAIN THIS BOOKLET FOR FUTURE REFERENCE.

This set has been designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated in this unit will protect you if you observe the following procedures for installation, use and servicing. This unit is fully transistorized and does not contain any parts that can be repaired by the user.

DO NOT REMOVE THE CABINET COVER, OR YOU MAY BE EXPOSED TO DANGEROUS VOLTAGE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL ONLY.

1. Read Owner's Manual

After unpacking this product, read the owner fs manual carefully, and follow all the operating and other instructions.

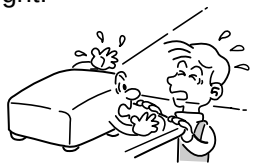


2. Power Sources

This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

3. Source of Light

Do not look into the lens while the lamp is on. The strong light from the lamp may cause damage to your eyes or sight.



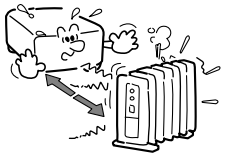
4. Ventilation

Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer fs instructions have been adhered to.

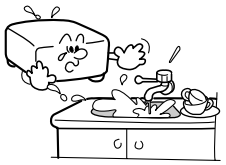
5. Heat

The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.



6. Water and Moisture

Do not use this product near water – for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool and the like.



IMPORTANT SAFETY INSTRUCTIONS (continued)

7. Cleaning

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

8. Power-Cord Protection

Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

9. Overloading

Do not overload wall outlets; extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

10. Lightning

For added protection for this product during storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet.

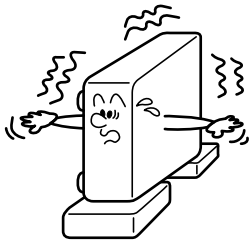
This will prevent damage to the product due to lightning and power-line surges.

11. Object and Liquid Entry

Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

12. Do not place the product vertically

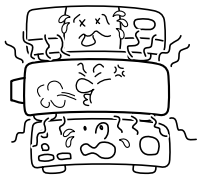
Do not use the product in the upright position to project the pictures at the ceiling, or any other vertical positions. It may fall down and dangerous.



13. Stack Inhibited

Do not stack other equipment on this product or do not place this product on the other equipment.

Top and bottom plates of this product develops heat and may give some undesirable damage to other unit.



14. Attachments

Do not use attachments not recommended by the product manufacturer as they may cause hazards.

15. Accessories

Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product.

Any mounting of the product should follow the manufacturer fs instructions, and should use a mounting accessory recommended by the manufacturer. A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

16. If glass components, including lens and lamp, should break, contact your dealer for repair service.

This product incorporates glass components, including a lens and a lamp. If such parts should break, please handle with care to avoid injury and contact your dealer for repair service. The broken pieces of glass may cause to injury. In the unlikely event of the lamp rupturing, thoroughly clean the area around the projector and discard

17. Damage Requiring Service

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

a) When the power-supply cord or plug is damaged.

b) If liquid has been spilled, or objects have fallen into the product.

c) If the product has been exposed to rain or water.

d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.

e) If the product has been dropped or damaged in any way.

f) When the product exhibits a distinct change in performance – this indicates a need for service.

18. Servicing

Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

19. Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards. (Replacement of the lamp only should be made by users.)

20. Safety Check

Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Do not get your hands between the camera arm and the main unit when setting the camera arm back in its original position.

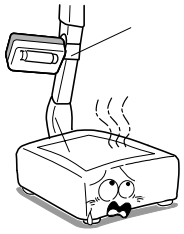
To avoid injury, be careful not to get your hands caught when setting the camera arm back in its original position. Families with children should be particularly careful.

22. Do not carry by the camera arm.

Do not carry the projector by the camera arm. Doing so can result in damage or injury.

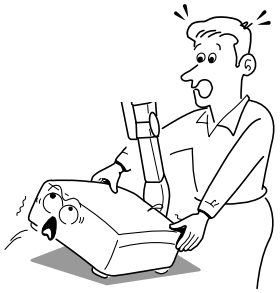
23. Do not leave documents on the unit for long periods of time while using the document imaging function.

Do not leave texts, papers or other documents for projection on the unit for long periods of time. The heat could erase the letters on a thermal paper.



24. Do not move the projector while the arm is still erect.

Always store the arm back in position when moving the projector. Otherwise injury or damage may result.

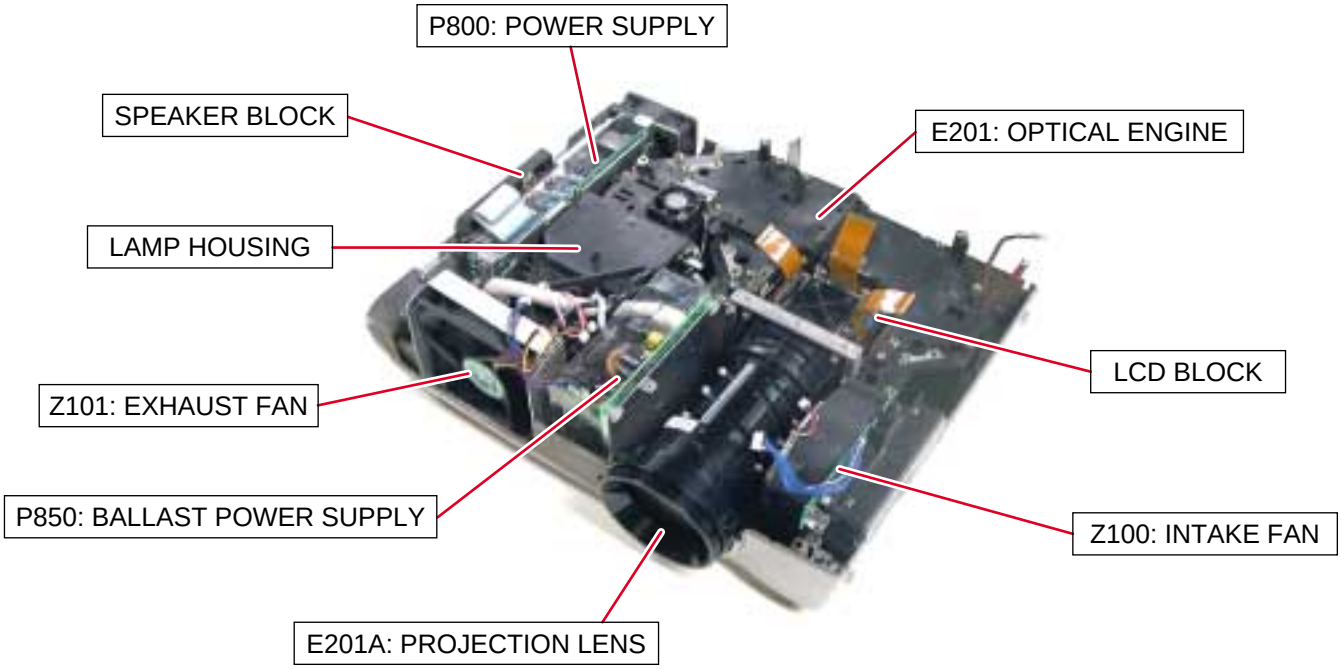


25. Do not look into the arm light while it is lit.

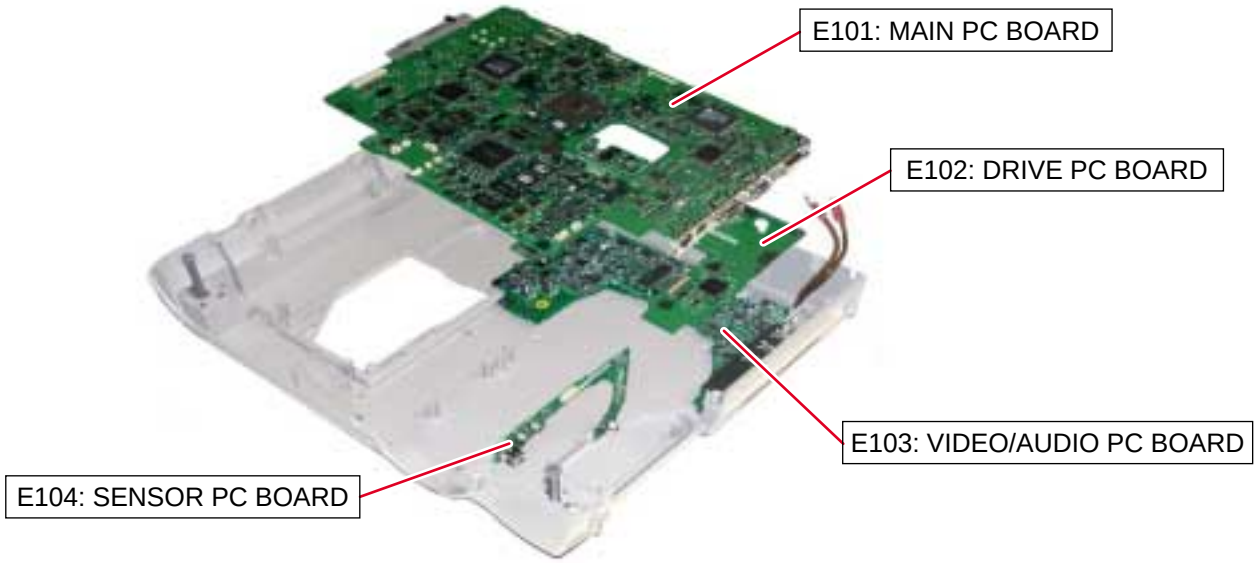
The strong light may cause damage to your eyes or sight.

SECTION 1
PART REPLACEMENT AND ADJUSTMENT PROCEDURES

1. LOCATION OF MAIN PARTS



2. LOCATION OF PC BOARD



CAUTIONS BEFORE SERVICING

Electronic parts are susceptible to static electricity and may easily be damaged, so do not forget to take proper grounding treatment as required.
Many screws are used inside the unit. To prevent missing, dropping, etc. of the screws, always use a magnetized screwdriver in servicing. Several kinds of screws are used and some of them need special cautions. That is, take care of the tapping screws securing molded parts and fine pitch screws used to secure metal parts. If they are used improperly, the screw holes will be easily damaged and the parts can not be fixed.

3. REPLACEMENT OF MECHANICAL PARTS

3-1. Lamp Assembly

Step	Figure	Explanation
1		Loosen 2 screws (M3 x 8). These screws are retained with split washers.
2		Remove the lamp cover.
3		Loosen 2 screws that secure the lamp module (M3 x 8). These screws are retained with split washers.
4		Lift the lamp module and slide out from the projector.

3-2. Top Cover

Step	Figure	Explanation
1		**[Left Side]** Remove 3 screws (M3 x 6). Screw : type [M-1] 
2		**[Right Side]** Remove 5 screws (M3 x 6). Screw : type [M-1] 
3		**[Front]** Remove 3 screws (2 x 5). Screw : type [M-2] 
4		Remove front cover. [Note] Unsnap the bottom first, and then unsnap the top.
5		**[Front]** Remove 1 screw (M3 x 6). Screw : type [M-1] 

3-2. Top Cover (Continued)

Step	Figure	Explanation
6		**[Rear]** Remove 3 screws (M2 x 5). Screw : type [M-2] 
7		Remove rear cover. [Note] Unsnap the bottom first, and then unsnap the top.
8		**[Rear]** Remove 1 screw (M3 x 6). Screw : type [M-1] 
9		**[Top]** Remove the small piece (One side is lifted and removed).
10		**[Top]** Remove 1 screw (M3 x 6). Screw : type [M-1] 

3-2. Top Cover (Continued)

Step	Figure	Explanation
11		Top cover can be removed by lifting left edge.

3-3. Main PC Board

Step	Figure	Explanation
1		Remove all cables and connectors.
2		Remove 6 screws (M3 x 6). Screw : type [M-1] 
3		Remove 1 screws (M3 x 6). Screw : type [M-1]  [Note] The screw here is also fixing the grand wire.

3-4. Drive PC Board

Step	Figure	Explanation
1		Remove all cables and connectors.
2		Remove 5 screws (M3 x 6). Screw : type [M-1] 
2a		[Note] The screw here is also fixing the grand wire.
2b		[Note] The screw here is also fixing the grand wire.

3-5. Power Supply

Step	Figure	Explanation
1		Disconnect the cable from the ballast power supply. (Plastic case is opened)
2		Remove 1 screw (M3 x 8). Screw : type [M-1] 
3		Remove 1 screw (M3 x 8). Screw : type [M-1] 
4		Remove 1 hook from the bottom cabinet in the direction of this arrow.
5		Remove 1 hook from the bottom cabinet in the direction of this arrow.

3-5. Power Supply (Continued)

Step	Figure	Explanation
6		Remove 1 screw (M3 x 6SW). Screw : type [E-2] 

3-6. Ballast power Supply

Step	Figure	Explanation
1		Remove 2 screws (3 x 8), then, disconnect the lamp cable connector. Screw : type [M-3] 
2		Remove 2 screws (3 x 8). Screw : type [M-3] 
3		Remove 1 screw (M3 x 6). Screw : type [M-1] 
4		Remove 2 hooks from the bottom cabinet in the direction of this arrow. (It removes in the order of (1) → (2).)
5		Release 4 P.C. board holder by using tweezers.

3-6. Ballast power Supply (Continued)

Step	Figure	Explanation
6		Remove the ballast power from the aluminum plate and plastic case.

3-7. Optical Engine

Step	Figure	Explanation
1		Remove 4 screws (3 x 12). .....(a)-(d) Screw : type [M-4]  Remove 1 screw (3 x 8). .....(e) Screw : type [M-3] 
1a		Enlargement (a)
1b		Enlargement (b)
1c		Enlargement (c)
1d		Enlargement (d)

3-7. Optical Engine (Continued)

Step	Figure	Explanation
1e		Enlargement (e) [Note] This screw is different from others.
2		Whole engine appearance view.
3		Remove 1 screw and remove the lamp house (M3 x 6). Screw : type [M-1] 
4		Remove 1 screw and remove the thermal breaker (3 x 8). Screw : type [M-3] 
5		Remove 1 screw and remove the PBS cooling fan (M2.5 x 14SW). Screw : type [E-9] 

3-8. LCD Panel

Step	Figure	Explanation
1		Remove 3 screws (M3 x 8SW) . Screw : type [E-1]  [Note] Tear off adhesive tape when you remove the screw of (A).
2		Separate the main frame and sub frame from the engine block.
3		Remove 3 screws (M3 x 12SW). Screw : type [E-10] 
4		Separate the prism block from the main frame.

3-8. LCD Panel (Continued)

Step	Figure	Explanation
5		Remove 4 screws (M2.6 x 6). Screw : type [E-3] 
6		Separate the LCD panel, mask and bracket. Note] Keep the mask because it is used again. The old LCD Panel and four screws are not used.
7		Remove 4 screws (M2 x 4). Screw : type [E-4]  [Note] Keep the screws because they are used again.
8		Remove the bracket. [Note] This bracket will not use again.

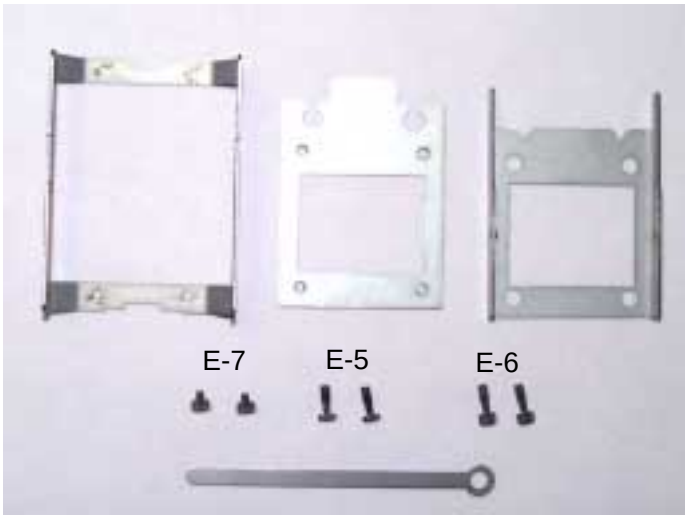
3-8. LCD Panel (Continued)

Step	Figure	Explanation
9		Use the panel holder Install a new panel with 4 screws. [Note] There are 2 kinds of types of the screw. (A) Side Screw : type [E-5]  (B) Side Screw : type [E-6] 
10		4 screws use for temporary tightening.
11		Tighten the new bracket with 4 screws (M2 x 4). Screw : type [E-4]  [Note] This 4 screws are from the old bracket.

3-8. LCD Panel (Continued)

Step	Figure	Explanation
12		Install the LCD panel holder assembly made by step 9 to the prism block.
13		Fix the LCD panel holder assembly on the bracket with 2 screws (M2x2). Screw : type [E-7] 
14		Fix a prism block on the lens block.

[Note] Panel holder service kit (23405001)



3-9. MULTI-PBS (Polarizing Beam Splitter)

Step	Figure	Explanation
1		Remove 4 screws (M2.5 x 8SW) . Screw : type [E-8] 
2		Remove the fitting spring from the the gap.
3		Remove the Multi-PBS.
4		[Note] Make sure the direction of the PBS when you install.
5		Insert the new Multi-PBS.

3-9. MULTI-PBS (Polarizing Beam Splitter) (Continued)

Step	Figure	Explanation
6		Install the fitting spring back to the gap.

3-10. Optical Engine Cooling Fan

Step	Figure	Explanation
1		Remove 3 screws (M2.5 x 5SW) . Screw : type [E-11] 
2		Remove the optical engine cooling fan.

3-11. Polarized Plate

Step	Figure	Explanation
1		Lift the stopper up by using the tweezers.
2		Remove the stopper.
3		Remove the polarized plate.
4		[Note] The film side must be faced to the LCD panel when installing and the color must be related with the color of LCD panel.

3-12. Intake Fan

Step	Figure	Explanation
1		Remove 1 screw (3 x 8). Screw : type [M-3] 
2		Remove intake fan block from the bottom cabinet.(It pulls up along with a rail.)
3		Remove filter block from the intake fan block.
4		The filter is split like this.
5		Remove 3 screws (3 x 35). Screw : type [M-6] 

3-12. Intake Fan (Continued)

Step	Figure	Explanation
6		The intake fan block is divided into the fan, senser pcb, and bracket.

3-13. Exhaust Fan

Step	Figure	Explanation
1		Remove 2 screws (3 x 8). Screw : type [M-3] 
2		Remove 2 screws (3 x 30). Screw : type [M-5] 

3-14. Speaker Block

Step	Figure	Explanation
1		Remove 2 screws (3 x 8). Screw : type [M-3] 
2		Remove 2 screws (3 x 8). The speaker will be removed like this. Screw : type [M-3] 

3-15. Video/Audio PC Board

Step	Figure	Explanation
1		Remove 5 screws (3 x 8). Screw : type [M-3]  [Note] The screw here is also fixing the grand wire.(Green marked)
2		[Note] The safety interlock switch is pushed when the lamp cover is replaced.
3		Remove video/audio PC board from the terminal bracket.

3-16. Document camera (How to remove from the main body)

Step	Figure	Explanation
1		Remove 5 screws (M3 x 8). Screw : type [M-7]  [Note] Please remove the screw (A) last. Then, support the camera block by hand, otherwise it falls.
2		Disconnect the connector from the main body. [Note] For disassembly of the document camera, refer to page 3-6.

3-17. Screws for Mechanical Patrs

Type	Form	Size	Location
M-1		M3 x 6	Top Cover (11), Main PCB (7), Drive PCB (5), Ballast Power Supply (1), Video/audio PCB (5) and Lamp House (1)
M-2		2 x 4	Front Cover (3) and Rear Cover (3)
M-3		3 x 8	Power Supply (1), Ballast Power Supply (2), Ballast cable connector (1), Intake FAN (1), Optical Engine (1), Exhaust FAN (2) and Speaker Block (4)
M-4		3 x 12	Optical Engine (4)
M-5		3 x 30	Exhaust FAN (2)
M-6		3 x 35	Intake FAN (3)
M-7		M3 x 8	Document camera (5)

3-18. Screws for Optical Engine

Type	Form	Size	Location
E-1		M3 x 8SW	LCD PANEL (3)
E-2		M3 x 6SW	Power Supply (1)
E-3		M2.5 x 6	LCD PANEL (4) * This screw will not use again.
E-4		M2 x 4	Bracket (4)
E-5		M2.5 x 6	LCD Panel (connector side) (2) *Contained in Panel holder kit.
E-6		M2.5 x 6	LCD Panel (2) *Contained in Panel holder kit.
E-7		M2 x 2	LCD Panel Bracket (2) *Contained in Panel holder kit.
E-8		M2.5 x 8SW	Multi-PBS Cover (4)
E-9		M2.5 x 14SW	Optical Engine (1)
E-10		M3 x 12SW	LCD Panel (3)
E-11		M2.5 x 5SW	Optical Engine Cooling FAN (3)

3-19. How to disconnect FFC/FPC Connector (1)

Step	Figure	Explanation
1		Conformity of Location number. MAIN PCB: PJ701
2		Release Two hooks. [Note] Hooks stop on the way. Please do not pull out by superfluous power.)
3		FFC/FPC cable can be disconnected.

3-19. How to disconnect FFC/FPC Connector (2)

Step	Figure	Explanation
1		Conformity of Location number. MAIN PCB: PJ801 DRIVE PCB: PJ751
2		Release hook cover.  [Note] Hook cover stops on the way. Please do not pull out by superfluous power.
3		FFC/FPC cable can be disconnected. 
3-19. How to disconnect FFC/FPC Connector (3)

Step	Figure	Explanation
1		Conformity of Location number. MAIN PCB: PJ301, PJ802 DRIVE PCB: PJ851, PJ901, PJ951
2		Release tow hooks.  [Note] Hook stops on the way. Please do not pull out by superfluous power.
3		FFC/FPC cable can be disconnected. 
3-19. How to disconnect FFC/FPC Connector (4)

Step	Figure	Explanation
1		Conformity of Location number. VIDEO/AUDIO PCB: PJ1, PJ5
2		Release hook. Side view  [Note] Hook cover stops on the way. Please do not pull out by superfluous power.
3		FFC/FPC cable can be disconnected. 
4. OPTICAL ADJUSTMENT

4-1. Preparation

< Test Equipments and Test Jigs >

- Personal computer (Windows P/C, OS:windows 95/98)
- Adjustment software **SINGO98.exe**
- RGB cable
- A precise screwdriver (minus)
- Hexagon Wrench (include Panel holder service kit) (Refer to page 1-17)
- Extension cable kit (Refer to page 2-7)

(1) Setting

Put PJ on the horizontal place, and project it on the vertical screen.

(2) Remove top cover

Refer to page 1-3.

(3) Remove Main PC board

Refer to page 1-6.

(4) Connect LCD panels by using extension cables

- Connect PJ851 and R-Panel with extension cable.
- Connect PJ901 and G-Panel with extension cable.
- Connect PJ951 and B-Panel with extension cable.

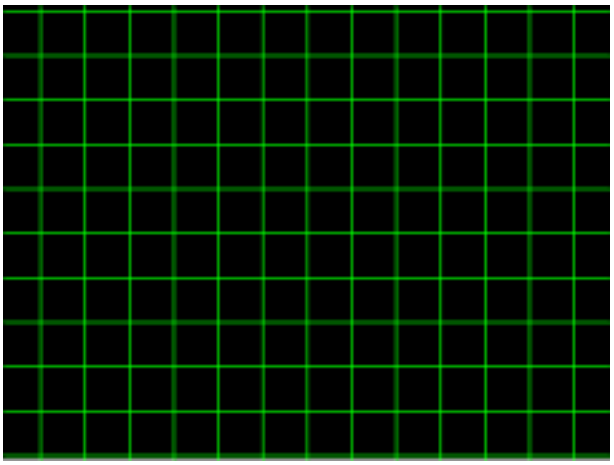
(5) Connect Main PC board by using extension cable kit

Be careful not to touch circuit and cabinet.

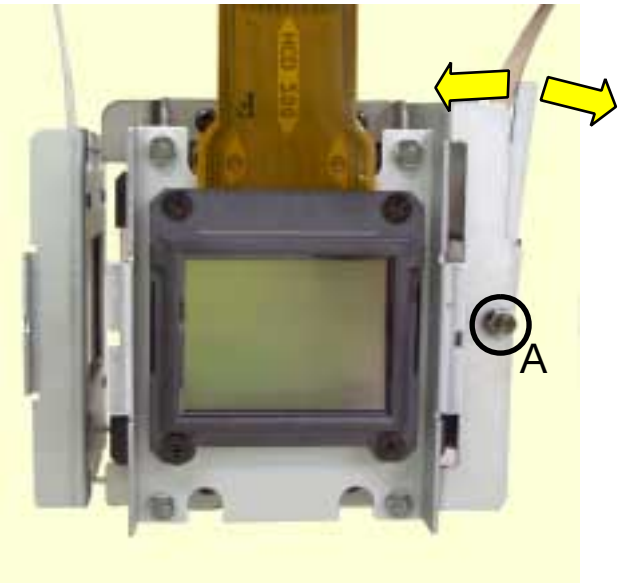
(6) Test Pattern Setup

- Connect a computer with RGB cable, and start the Pattern generating software (SINGO98.exe).

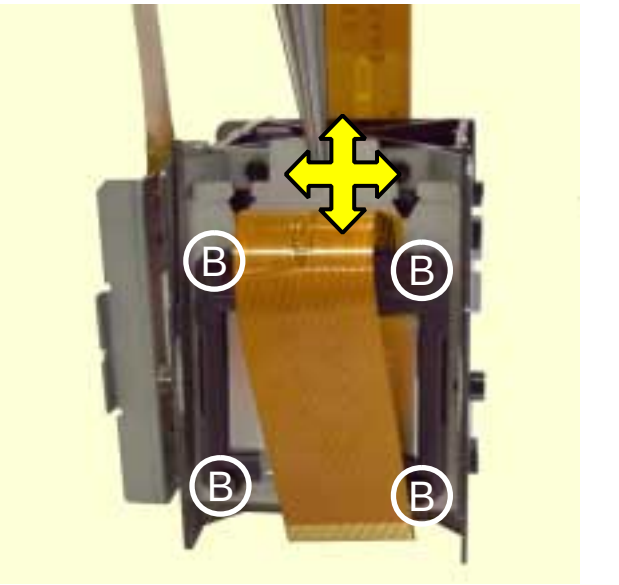
- Click cross hatch button.
- Click [R] and [B] button to display G-Cross Hatch.



(7) Focus Adjustment



- When this screw (A) is loosened, the panel moves to front and back, and focus can be adjusted.



- When these screws (B) are loosened, the panel moves to left,right,up and down, and convergence can be adjusted.

4-2. Adjustment of Focus (ex. Red panel exchange)

Step	Figure	Explanation
1		TEST PATTERN : Green Cross Hatch Adjust focus by projection Lens.
2		TEST PATTERN : Red Cross Hatch Move the panel in front and back, and adjust the focus. Tighten two screws little by little.
3		
4		Tighten two screws, when you reached to the best focus point.

4-2. Adjustment of Focus (ex. Red panel exchange) (Continued)

Step	Figure	Explanation
5		TEST PATTERN : Red and Green Cross Hatch Move the panel in left, right, up and down, and adjust the convergence.
6		
7		Tighten four screws.

5. ELECTRICAL ADJUSTMENT

5-1. Preparation

< Test Equipments and Jigs >

- Personal computer (Windows P/C, OS:windows 95/98)
- Adjustment software
  SINGO98.exe, TLPX10S.exe, CNTX10S.exe
- RGB cable, Serial control cable (for RS-232C)
- Oscilloscope
- Digital voltmeter
- Extension cable kit (Refer to page 2-7)

< Connection and Setting of Personal Computer >

(1) Connection of personal computer

Connect a computer as shown in following Fig. 1-4-1.
Use the supplied serial control cable for connection.

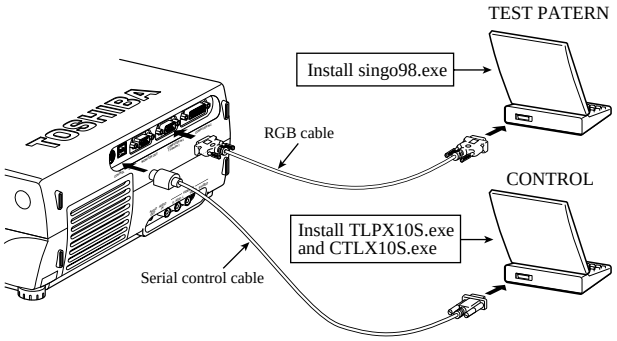


Fig. 1-4-1

(2) Data download/upload software

When the download software (CTLX10S.EXE) is started, screen like the following image (Fig. 1-4-2)

Fig. 1-4-2

(3) Adjustment software

Electrical adjustment is carried out using the adjustment software. When the software (TLPX10S.EXE)is started, a screen like the following image (Fig. 1-4-3) appears.

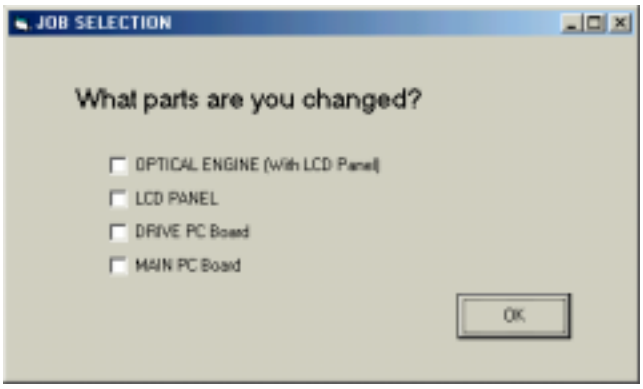

Fig. 1-4-3

(Note)

Electrical adjustment menu changes automatically by pressing [next] button with every step. This software transmits the necessary command automatically.

5-2. All adjust data download (When the Main PC board will be replaced.)

Step	Figure	Explanation
1		Start the download software (CNTX10S.exe). Press [UP/DW] tab.
2		Press [Read] button. The all data will be read form projector in a few minutes.
3		When a dialog is indicated, it finishes reading all data. Key in the file name (=Serial Number). Press [Save] button to save the data.
4		After replacing the Main PC Board, press [Write] button.

Step	Figure	Explanation
5		When this dialog is indicated, select the data file (=Serial Number). Press [Open] button.
6		When this message screen appears, press [ok] button. Then, all data (in the old PCB) will be written to the projector.
7		Check the all input signals. All input signals is fare, press [Save] Button.

5-3. Electrical adjustment

5-3-1. Menu selection

Step	Figure	Explanation
1		Start the download software (TLPX10S.exe). Select the parts that you changed. Press [OK] button.

5-3-2. Keystone setting (1) (In case of Main PCB was changed.)

Step	Figure	Explanation
1		(1) Select "Keystone1" step. (2) Set the projector horizontally, and click [KC0] button. (3) Set the projector to a +30 degree angle, and click the [KC1] button. (4) Set the projector to a -30 degree angle, and click [KC2] button. (5) Press [Next] button. [Note] * A green button is available. * All the data is saved, when [Next] button is pushed.

5-3-3. Drive setting (DVI signal)

Step	Figure	Explanation
1		Use the extension cable kit.
2		(1) Select "Drive" step. (2) Press [Start] button.
3		(1) Monitor the waveform at the respective test point ("TP-RIN" when you adjust the R level). (2) When the [WN7] button is clicked, you enter the "R" adjustment mode. (3) Click [+] or [-] button to adjust the signal level. (4) Adjust "G" and "B" colors to be the same. (5) Click [Next] button to proceed to the next adjustment.

Step	Figure	Explanation
4		(1) Monitor the waveform at the test point "TP-R". (2) Click [WM7] button and adjust to the specified level. (3) Check the voltage at the test points "TP-R" and "TP-B". (4) Click [Next] button. [Note] "G" and "B" levels also change when [WM7] adjustment is performed.
5		(1) Monitor the waveform at test point "TP-R". (2) Click [W03] button and adjust to the specified level. ([W09] and [W0C] are the same process.) (3) Click [Next] button.
6		(1) Monitor the waveform at test point "TP-G". (2) Click [W04] button and adjust to the specified level. ([W0A] and [W0D] are the same process.) (3) Click [Next] button.
7		(1) Monitor the waveform at test point "TP-B". (2) Click [W05] button and adjust to the specified level. ([W0B] and [W0E] are the same process.) (3) Click [Next] button.

5-3-4. Setting signal level

Step	Figure	Explanation
1		(1) Select "Signal level" step. (2) Press [Start] button.
2		(1) Press [VSR] button and click [+] or [-] button to adjust the signal level. (2) Press [VGR] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button.
3		(1) Press [VSG] button and click [+] or [-] button to adjust the signal level. (2) Press [VGG] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button.
4		(1) Press [VSB] button and click [+] or [-] button to adjust the signal level. (2) Press [VGB] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button.

Step	Figure	Explanation
5		(1) Press [VSR] button and click [+] or [-] button to adjust the signal level. (2) Press [VGR] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button.
6		(1) Press [VSG] button and click [+] or [-] button to adjust the signal level. (2) Press [VGG] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button.
7		(1) Press [VSB] button and click [+] or [-] button to adjust the signal level. (2) Press [VGB] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button.
8		SOURCE : DVD Color bar component Y signal. (1) Press [VSR] button and click [+] or [-] button to adjust the signal level. (2) Press [VGR] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button. **NOTE: Display image disappears when [VSR] button is pushed.**

Step	Figure	Explanation
9		(1) Press [VSG] button and click [+] or [-] button to adjust the signal level. (2) Press [VGG] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button. **NOTE: Display image disappears when [VSG] button is pushed.**
10		(1) Press [VSB] button and click [+] or [-] button to adjust the signal level. (2) Press [VGB] button and click [+] or [-] button to adjust the signal level. (3) Press [Next] button. **NOTE: Display image disappears when [VSB] button is pushed.**
11		(1) Select a red single color screen when adjusting R. Click [WM6] button, and adjust the flicker level to minimum in both + and - directions, taking note of the data values. Then set data to the mid-point between the two previously noted values. (2) Adjust other colors to be the same, using [WM5] for green and [WM4] for blue. (3) Click [Upside Down] button to change projection mode. (4) Adjust this mode in the same way. (5) Click [Next] buttons.

5-3-5. White balance

Step	Figure	Explanation
1		(1) Select "White Balance" step. (2) Press [Start] button.

Step	Figure	Explanation
2		(1) Click [W03] and/or [W05] buttons, and adjust screen until it becomes a natural gray. (2) Click [W09] and/or [W09] or [W0A] buttons, and adjust screen until it becomes a natural gray. (3) Click [Next] button.
3		(1) Click [WN7] and/or [WN9] buttons, and adjust screen until it becomes a natural gray. (2) Click [Next] button.

5-3-6. Keystone setting (2)

Step	Figure	Explanation
1		(1) Set the projector horizontally, and click [KC3] button. **[Note - Important]** **The deviation of the inclination sensor due to rise in temperature is corrected by measuring after warming up for approximately one hour.**
2		When the adjustment is completed, press [OK] button.

SECTION 2
SERVICING DIAGRAMS

1. TROUBLE SHOOTING

CAUSE	CHECK POINT	CHEK ITEM	JUDGE
Power is not on	Flat cable of Power supply (disconnect PJ701)	Standby voltage (See page 2-4)	(NG) → Power supply is NG. (OK) → Check next step.
	PJ701(connect PJ701)	Standby voltage	(NG) → Main PCB is NG, or any cable connection is NG.
Power off during use	LED Display	Lighting pattern	See 2-2
Lamp is not on	Lamp	Any damage inside or not	(Damaged) → Change with new lamp. (Not Damaged) → Check Lamp cover, PJ11 or lamp power supply. However, even if the lamp has no damage, there is the case it has trouble also.
No image	"No Signal" OSD message	Indicated or not	(Indicated) → RGB/Video terminal is NG, or Main PCB is NG. (Not Indicated) → Check next step.
	Test Point TP-R TP-G TP-B	Signal shape	(Correct) → LCD panel is NG, or PJ851/PJ901/PJ951 is NG. (Incorrect) → Main PCB is NG.

ATTENTION

LED displays various error pattern. (See 2-2)
Be careful because the same error occurs in the bad contact of the cable as well.
LED error combination display always show the latest error.

2. LED DISPLAY (Problems Shown on LED Indicator Combination)

Status of Indicator Light			Cause and Trouble	Solution
TEMP BUSY	LAMP	ON FAN		
(OFF) (OFF)	(OFF)	(OFF) (OFF)	Standby-power is not on > There's a problem with the power unit or system microcomputer.	Check the power unit. Check the connector (PJ12).
(OFF) (OFF)	(OFF)	(RED) (OFF)	Power is not on > There's a problem with the system microcomputer.	Check the main PC board.
(OFF) (OFF)	(RED)	(RED) (OFF)	The lamp went out during use or the lamp will not switch on > The bulb has reached the end of it's life	Change new lamp. There may also be trouble in ballast power supply.
(RED) (OFF)	(OFF)	(RED) (OFF)	The power turns off or does not come on > The inside is too hot, or the projector has been working in an area of high temperature.	Place the projector correctly so the intake and exhaust fan's holes are not covered. Turn the projector off, and leave it for a while, and turn it on again. Clean the air filter.
(RED) (OFF)	(OFF)	(RED) (GREEN)		
(Orange) (OFF)	(OFF)	(RED) (OFF)		
(Orange) (OFF)	(OFF)	(RED) (GREEN)		
(GREEN) (OFF)	(OFF)	(RED) (OFF)		
(GREEN) (OFF)	(OFF)	(RED) (GREEN)		
(OFF) (OFF)	(OFF)	(RED) (RED)	The power turns off or does not come on > Trouble with the cooling fans.	Check the each cooling fan.
(OFF) (OFF)	(OFF)	(RED) (RED Flashing)		
(OFF) (OFF)	(OFF)	(RED) (Orange)		
(OFF) (OFF)	(OFF)	(RED) (Orange flashing)		
(OFF) (OFF)	(Orange flashing)	(RED) (OFF)	The power turns off or does not come on >Trouble with the Lamp cover	The lamp cover is not properly attached. Unplug the power cord and reattach the lamp cover.
(OFF) (OFF)	(Orange)	(RED) (GREEN)	The power turns off > System error.	Wait for two minutes, and turn on the power again.

NOTE

In each mode shown with this color, the projector returns to the standby mode after error indication for about 2 minutes.

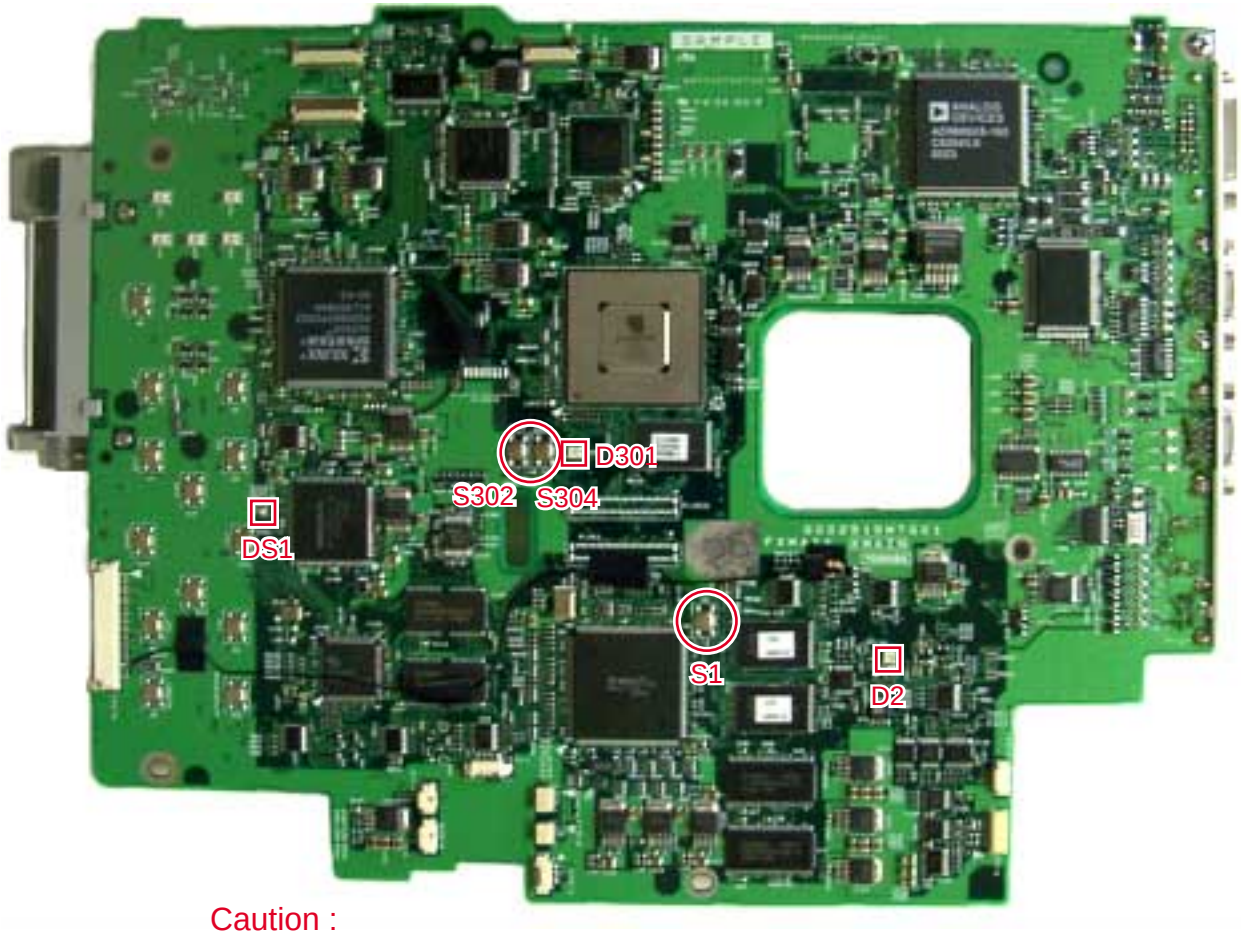
7. EXPLANATION OF MAIN / DRIVE PC BOARD

7-1. Main PCB



Caution :

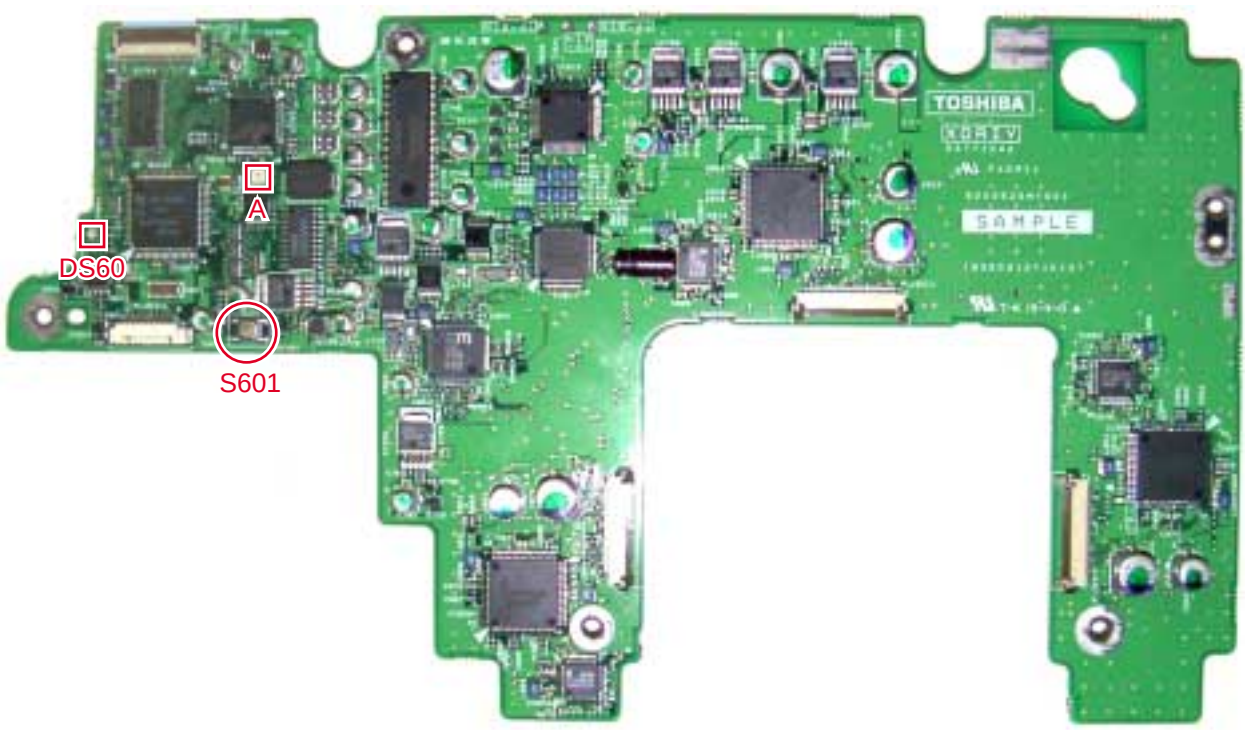
Please do not touch these switches by any means at the time of service

○ : Button Switch □ : LED

Explanation of each part article of operation

Parts Name	Explanation of operation	LED Display		
		Standby	Operation	Abnormal
S1	Reset switch for IC101			
D2	Check for IC101 operation			IC101 failure
S302	Reset switch for IC301			
S304	Reset switch for IC301			
D301	Check for IC301 operation			IC301 failure
DS1	Check for IC41 operation			IC41 failure

7-2. Drive PCB



Caution :

Please do not touch these switches by any means at the time of service

○ : Button Switch □ : LED

Explanation of each part article of operation

Parts Name	Explanation of operation	LED Display		
		Standby	Operation	Abnormal
S601	Reset switch for IC603			
DS601	Check for +5V power-supply			+5V failure
A	Check for IC603 operation			IC301 failure

SECTION 3
PARTS LIST

SAFETY PRECAUTION

Replace only with part number specified. The mounting position of replacement is to be identical with originals. The substitute replacement parts which do not have the same safety characteristics as specified in the parts list may create shock, fire or other hazards.

NOTICE

The part number must be used when ordering parts in order to assist in processing, be sure to include the model number and description.

SPECIFICATIONS

Main Unit

	TLP-X10 / TLPX20	TLP-X11 / TLPX21
Power requirements	AC 100-240V 50/60Hz	
Power consumption	320W (standby:18W)	330W (standby:18W)
Mass	5.3kg	6.2kg
Dimensions	W345mmxH104mmxD281mm	W345mmxH104mmxD336mm
Ambient environment	Temperature:0 to 35 cent degree Humidity:30% to 70% HR	
Lamp	210W High pressure Hg lamp	
Speaker	2W (monaural)	
RGB INPUT	RGB signal :(D-sub 15pin)	
VIDEO INPUT	S-Video signal : Mini DIN-4pin Video signal : 1V(p-p), 75 ohm	
CONTROL terminal	Mini DIN-8pin(RS-232C)	
Cabinet Material	ABS	
Document camera		1/2 inches CCD 1,447,680 pixels (1392x1040 dots) Lens : F=3.1 f=6.4mm

LCD

Projection system	3-panel transmission
Panel size	1.3 inches
Driving system	TFT active matrix
Picture elements	786,432 pixels (1024x768dits)

Projection Lens

Lens	Zooming lens F=2.2-2.5 f=47-61mm
Focusing	Manual operation
Zooming	Manual operation

— SUMMARY —

This service manual covers only different portions from service manual (File No. 330-200008) for TLPX10/20 series.

Document Created in Japan May.,2002

The following parts list covers only the different parts from the base models,

For the other parts, please refer to the service manual(File No, 330-200008) of the base models,

The base models of each model are shown below,

	Base Model
TLPX20DU	TLPX20U
TLPX21DU	TLPX21U (with document imaging camera)
TLPX20DE	TLPX20E
TLPX21DE	TLPX21E (with document imaging camera)
